

Daler Rowney – ‘Calli’ Calligraphy Inks

Calli is an acrylic based range of pigmented water resistant inks designed specifically for use in calligraphy, where optimum flow characteristics from the pen or brush are essential.

Calli Inks have excellent colour strength, and are produced in a range of six colours, although each is fully intermixable with the others. The inks can be rinsed and diluted with distilled water. Should the inks become dry in the pen or on the nib they can be cleaned with Airbrush Cleaning Fluid.

Pearlescent Inks 29.5ml £4.75 each

Daler Rowney - FW Acrylic Inks

FW Artists' Ink is an acrylic based pigmented water resistant ink in a range of 38 colours, all of which have 3 or 4 star rating for permanence. This high degree of lightfastness makes them ideal for use in work for permanent display.

Colour strength is high but colours can be substantially diluted to achieve subtle tones very similar in character to watercolour. Such washes dry to a water resistant film and successive layers of colour can be laid over. A wash can be laid and lettered over without fear of bleeding or smudging.

FW Artists' Inks work well with a dip pen or brush and can be rinsed and diluted with distilled water. If the ink is allowed to dry on pens it can be removed with Airbrush Cleaning Fluid.

Lemon Yellow	Marine Blue	Black (India)
Process Yellow	Sap Green	White
